## **Epigenomics AG: Notice of Loss pursuant to § 92 par. 1 AktG**

**April 17, 2018** – The Executive Board of Epigenomics AG (FSE: ECX; OTCQX: EPGNY) notifies that according to its best judgment a cumulative loss of more than half of the nominal share capital of the Company has been incurred. The anticipated development of the share capital is mainly attributable to budgeted losses from regular business operations.

While current financial resources of the Company are sufficient to support the operations beyond 2018, the Executive Board expects to be able to raise additional capital in 2018.

Pursuant to Sec. 92 par. 1 German Stock Corporation Act (“Aktiengesetz”), a loss amounting to half of the nominal share capital triggers the statutory obligation to summon a general meeting of shareholders without undue delay. In this meeting, the Executive Board will notify the loss of half of the nominal share capital and outline the situation of the Company. An invitation including an agenda to the extraordinary general meeting will be provided in due time and form.
