

Press release

Epigenomics AG Announces Conference Call with Authors Presenting at the European Public Health Conference

Berlin (Germany) and San Diego, CA (U.S.A.), November 15, 2019 - Epigenomics AG (FSE: ECX, OTCQX: EPGNY) today announced that Dr. Medhi Najafzadeh, PhD and Dr. Elvira D'Andrea, MD, MPH, two of the lead authors of the microsimulation model comparing outcomes of colorectal cancer screening methods, including the Epi proColon® blood test, will participate in a conference call on November 21, 2019 at 3pm CET. Dr. Najafzadeh and Dr. D'Andrea, both from the Division of Pharmacoepidemiology and Pharmacoeconomics at Harvard Medical School, will discuss Dr. D'Andrea's conference presentation entitled "Quantifying the impact of adherence to screening on colorectal cancer incidence and mortality" at the upcoming European Public Health conference. Investors are invited to participate via Webcast. The Webcast can be accessed in the investor relations section of the Epigenomic's website at www.epigenomics.com/news-investors/. The dial-in numbers will be published in the financial calendar in the coming week.

About Epigenomics

Epigenomics is a molecular diagnostics company focused on blood-based detection of cancers using its proprietary DNA methylation biomarker technology. The company develops and commercializes diagnostic products across multiple cancer indications with high medical need. Epigenomics' lead product, Epi proColon®, is a blood-based screening test for the detection of colorectal cancer. Epi proColon has received approval from the U.S. Food and Drug Administration (FDA) and is currently marketed in the United States, Europe, and China and selected other countries. Epi proLung®, a blood-based test for lung cancer detection, and HCCBloodTest, a blood-based test for liver cancer detection in cirrohtic patients, have received CE mark in Europe.
